

● FUNDING STRATEGY

Grants & Funding Guide

Earn / Morpho Yield & Risk Intelligence SaaS
on Robinhood Chain

Can you get a grant? Where to apply · Odds · Pitch angles · Application outline · Action order

Short answer

Yes — you can chase funding for this product. Best fits: **Arbitrum Foundation grants** (Infrastructure & Tools / dApps) and **Arbitrum Open House** prizes (Robinhood committed \$1M toward RH Chain builder support). Morpho DAO/ecosystem grants when rounds are open. There is **no public Robinhood Chain grant form** — use BD email instead. Ship MVP first; grants fund shipping teams, not slides.

Product: Morpho vault explorer · Robinhood Earn risk/APY intelligence · portfolio · alerts

Compiled: July 2026 · **Disclaimer:** Not financial, legal, or fundraising advice. Programs change; verify links and open rounds before applying.

1. Executive Answer

Your product (Morpho / Earn yield explorer + risk intelligence + portfolio tracker on Robinhood Chain) is a **good grant fit**: DeFi tooling, retail UX, Morpho surface area, Arbitrum Orbit / Dedicated blockchain narrative. It is **not** a guaranteed grant.

Question	Answer
Can I get grant/funding?	Yes — eligible and aligned; competitive, not automatic
Best cash/prize path?	Arbitrum Foundation grants + Open House (RH-backed)
Robinhood open grant form?	No public portal found — BD email only
Morpho grants?	Logical fit; check forum for open DAO rounds
Wait for grant before building?	No — ship MVP with URL + metrics first
Replace SaaS revenue with grants?	No — grants are bonus; charge Pro in parallel

Table: Executive Q&A.

2. Why This Product Is Fundable

What funders like	Why your app matches
Retail DeFi education / transparency	Earn "7%" clarity — base APY vs incentives vs risk
Morpho ecosystem tooling	Vault explorer, positions, net APY, allocations
Arbitrum / Orbit growth	Built on Robinhood Chain (Arbitrum stack)
Public goods / infra & tools	Read-only explorer; not a memecoin casino
Live product + metrics	Stronger than idea-only decks

Table: Fundability fit factors.

Weak alone: "We'll raise a VC seed for a dashboard with no users."

Strong path: Ship MVP → apply with metrics → Open House / Foundation grant → angel/VC only if growth warrants.

3. Funding Sources (Ranked Best → Weaker)

3.1 Arbitrum Foundation Grants — best formal fit

- **Status:** Applications open on a rolling basis (verify current phase on site)
- **Categories:** Decentralized Applications (dApps) + **Infrastructure & Tools** — your product is tooling
- **Typical size (public ranges):** often cited ~\$20,000–\$150,000 in ARB; milestone-based disbursement
- **Why you fit:** RH Chain is Arbitrum Dedicated/Orbit-style; DeFi tooling increases usage and retail onboarding
- **Apply:** <https://arbitrum.foundation/grants> (Notion application form linked from page)

Pitch angle (Arbitrum Foundation)

"Retail transparency layer for Morpho vaults and Robinhood Earn on Robinhood Chain — net APY vs incentives, portfolio tracking, and alerts — reducing confusion and increasing safe DeFi adoption on the Arbitrum stack."

3.2 Arbitrum Open House 2026 — prizes + exposure (RH-backed)

- Robinhood committed **\$1 million USD** toward Open House support for builders on **Robinhood Chain**
- Program: online Buildathons + in-person Founder Houses (NYC, London, Dubai, Singapore, and related events)
- City prize pools have been substantial (e.g. London Founder House materials cited ~\$300k prizes/grants; NYC and others also awarded large pools)
- This is **prize/program funding**, not a multi-year grant — highly aligned if you demo a live explorer on RH Chain

- **Hub:** <https://openhouse.arbitrum.io/>

3.3 Robinhood Chain direct BD — soft support, not a grant form

- **No** public dedicated Robinhood Chain grant application portal found as of this research
- Contact: **chain-developers-group@robinhood.com**
- Ask for: ecosystem page listing, product feedback, partner intros, possible infra credits
- Pitch: live product + users + how you help Earn / Wallet users understand Morpho risk
- Treat as **distribution and relationships**, not day-one cash

3.4 Morpho ecosystem / DAO grants — logical, check current round

- Morpho ran a grants pilot (e.g. MIP 93): pool on the order of **200k MORPHO**, DAO-voted, milestone payouts (portion upfront, portion on completion, remainder on metrics)
- Later DAO activity includes larger Association multi-year budgets; external builder rounds come and go
- Action: monitor <https://forum.morpho.org> for open “Call for Grants” / Questbook rounds before applying
- If no open round: ship live tool and engage Morpho ecosystem / curator community (partnership can beat a closed grant round)

Pitch angle (Morpho)

“Best Morpho UX for Robinhood Chain / Earn users — vault registry, positions, risk breakdown driving Morpho literacy and usage on a high-distribution L2.”

3.5 Credits & non-cash (easy wins)

Source	What you might get	Notes
Alchemy	RPC / compute credits	RH recommends Alchemy; historical grant programs existed — ask partnerships
Hosting (Railway / Vercel)	Startup credits	Low effort, reduces opex
Paxos / USDG / Global Dollar Network	Partner economics more than micro-grants	Relevant if you become a real USDG surface, not pure dashboard alone

Table: Non-cash support.

3.6 Outside pure grants

Type	Realistic for you?	When
Angels / micro-seed	Possible	After MVP + early MRR or strong usage
Crypto accelerators	Possible	Live product + clear chain thesis
Gitcoin / quadratic	Sporadic	If a round matches DeFi tooling
VC seed	Low early	Unless growth is sharp; dashboard alone is hard

Table: Non-grant capital paths.

4. Honest Odds Matrix

Path	Odds of some money	Expected amount	Effort
Open House prize	Medium if you ship + demo	\$5k–50k+ (highly competitive)	High (event + demo)
Arbitrum Foundation grant	Medium with live product + milestones	\$20k–80k typical tooling ask band	High (app + milestones)
Morpho grant (if open)	Low–medium	Variable (pilot was modest MORPHO)	Medium
RH cash grant	Low (no portal)	Unclear	Low effort email
Alchemy credits	Medium	Credits, not cash	Low
VC without traction	Low	—	High waste if premature

Table: Rough probability and size — directional only.

Bottom line: Funding is available and your idea is eligible — mainly Arbitrum (Foundation + Open House) and possibly Morpho when rounds are open. Do not wait for a grant to start building.

5. How to Maximize Chances (Action Order)

1. **Ship a public MVP** on RH Chain (even 1–3 vaults + Earn spotlight + wallet positions).
2. **Metrics pack:** weekly users, wallets connected, vaults tracked, alert signups, retention if any.
3. **Apply Arbitrum Foundation** under Infrastructure & Tools / dApp with milestones.
4. **Register Open House** and prepare a live demo on Robinhood Chain.
5. **Email** chain-developers-group@robinhood.com with link + metrics + one-pager.
6. **Watch Morpho forum** for next grants call; engage Discord/community if active.
7. **Ask Alchemy** for credits once you are on their Robinhood Chain stack.
8. **Charge Pro** (\$10–20/mo) in parallel — revenue de-risks every application.

6. Grant Application Outline (Copy Framework)

Section	What to write
Problem	Earn users don't understand variable APY, incentives, withdraw/liquidity risk, or curator role
Solution	Euler-like Morpho vault explorer + risk split + portfolio + alerts on Robinhood Chain
Why Arbitrum / RH	Orbit/Dedicated L2; Morpho already powers Earn; retail distribution funnel
Traction	Public URL, users, wallets connected (even small numbers beat zero)
Milestones	M1 live Explore · M2 Portfolio · M3 Alerts · M4 history/multi-vault polish
Ask	e.g. \$40k ARB over 4 milestones — or Open House prize track
Budget	Hosting, RPC, design, part-time help — not founder lifestyle salary
Open source?	Optional public APIs / risk formulas help “public goods” narrative
Impact metrics	MAU, wallets, vaults listed, alert fires, open-source stars, docs used

Table: Application skeleton for Arbitrum / similar programs.

7. Pitch Angles by Funder

Funder	Lead with	Avoid
Arbitrum Foundation	Orbit growth, tooling, onchain activity, milestones	Vague “AI DeFi” with no demo

Funder	Lead with	Avoid
Open House judges	Live demo on RH Chain in 3 minutes, clear retail problem	Long tokenomics pitch
Robinhood BD email	Help Earn users; safety/clarity; ecosystem listing readiness	Asking for cash in first line
Morpho community	Morpho usage, vault UX, positions API, open tooling	Ignoring Morpho brand guidelines
Alchemy	Usage of RPC/AA on RH Chain; growth plan	Demanding cash grants only

Table: Customize the same product story per audience.

8. What Not to Expect

- Instant cash for an idea deck with no live product
- Robinhood writing a personal check from a public grant form (none found)
- Grants fully replacing the need for users or SaaS revenue
- Morpho funding you only because you mention “Earn” without a live integration
- VC seed solely on “dashboard for vaults” with zero traction
- Open House prizes without showing up and demoing

9. Practical Recommendation

Goal	Do this
Fastest path to “funded”	Build 4–6 week MVP → Open House + Arbitrum grant the same month
Cash independence	Charge Pro (\$10–20/mo) in parallel — grants are bonus
Best narrative line	“Transparency layer for Robinhood Earn / Morpho on RH Chain”
If grant rejected	Keep shipping; reapply next phase with better metrics
If prize won	Use funds for RPC, design, alerts infra — publish milestones publicly

Table: Decision defaults.

Default 90-day funding plan

Days 1–30: Public MVP on chain 4663. Days 31–45: Metrics dashboard + one-pager. Days 45–60: Submit Arbitrum Foundation application + Open House registration. Days 60–90: RH BD email, Morpho forum check, Stripe Pro live, re-apply or report milestones.

10. Checklist Before You Apply

- Live HTTPS URL on mainnet data (not localhost)
- At least Explore + one vault detail + connect wallet or clear portfolio path
- Disclaimer: not financial advice; yields variable; not FDIC/SIPC
- One-page PDF or Notion: problem, solution, screenshots, milestones, ask, team
- GitHub or public repo optional but helpful for tooling grants
- Wallet addresses / multisig ready if they pay in ARB/MORPHO
- Legal entity optional early; some programs prefer one for larger amounts
- No misleading Robinhood / Morpho affiliation claims

Table: Primary links — re-verify before use.

12. Closing Summary

Yes, you can get grant- and prize-style funding for an Earn/Morpho yield & risk intelligence product on Robinhood Chain. The strongest formal paths are the **Arbitrum Foundation** and **Arbitrum Open House** (with Robinhood's \$1M builder support narrative). **Morpho** is a natural second track when DAO grants are open. Robinhood itself is best approached via **ecosystem BD email**, not a public grant form. Credits (Alchemy, hosting) reduce burn cheaply.

Ship first. Apply with a URL and metrics. Charge users in parallel. Grants accelerate a real product — they do not create one.

Priority	Action	Outcome sought
1	MVP live on RH Chain	Fundable artifact
2	Arbitrum Foundation apply	Milestone cash/ARB
3	Open House demo	Prize + network
4	RH BD email	Listing / intros
5	Morpho forum / community	Grant or partnership
6	Pro SaaS revenue	Independence

Table: Priority stack.
